

# FLANGED VALVES

# FLANGED VALVES

# PRODUCT LEAFLET

# DESCRIPTION

Very high performance diaphragm valve with flanged inlet port and slide seal outlet port for easy valve installation and removal. Available with integral pilot or as remotely piloted valve. Outlet at 90° to inlet.

## **SUITABLE FOR**

Dust collector applications, in particular for reverse pulse jet filter cleaning and its variations, including bag filters, cartridge filters and envelope filters, ceramic filters and sintered metal fibre filters.

# CONSTRUCTION

Body: Diecast aluminium or 316 stainless

steel

Ferrule: 305 SS Armature: 430FR SS Seals: Nitrile or Viton Spring: 304 SS Screws: 302 or 304 SS

Outlet Slide Seal: EPDM or Viton Diaphragm Seat: PA-66 (standard), Viton

coated mild steel

Refer to Q Series Solenoid product data sheet for solenoid construction details.

## **OPERATION**

Recommended on-time range: 50–500 ms Recommended time between pulses: 1 minute or greater

#### **MAINTENANCE**

Before conducting any maintenance activity on the system ensure that components are fully isolated from pressure and power supplies. Pressure and power should not be reapplied until the valve has been fully assembled. Diaphragm and pilot inspection should be conducted annually.

#### **APPROVALS**

- ATEX II 3 GD (RCA/RCAC only)
- CSA (C, US) [C22.2 No 139–10 and UL 429:2009] (CA & RCA)
- C-Tick (CA)
- EMC 2004/108/EC (CA)
- Low Voltage Directive 2006/95/EC (CA)

#### **INSTALLATION**

- Prepare inlet flanges and blowtube pipes to suit valve specification. Avoid installing valves underneath the tank.
- 2. Ensure tank and pipes are free from dirt, rust or other particulate.
- 3. Ensure supply air is clean and dry.
- Mount valves to inlet flange and blowtube to valves with all seals in place. Tighten flange bolts to 10Nm (7.4 ft-lbs) Ensure blowtube is pushed all the way into the valve outlet.
- 5. Tanks and pipes must be independently supported from valve.
- Make electrical connections to solenoid or connect RCA pilot port to pilot valve (RCA valves only).
- 7. Apply moderate pressure to system and check for installation leaks.
- 8. Fully pressurise system.
- 9. Test fire and listen for proper actuation and crisp pulse noise.

Valve is not a structural component. Do not rely on valve to retain tanks or pipe. Where used, refer to DEINC-002 product specification for installation details.

PRODUCT LEAFLET

## RCAC20FS4 - REVERSE PULSE JET VALVES

#### **DIMENSIONS IN MM (AND INCHES)**

## **DESCRIPTION**

High-performance diaphragm valve with a flanged inlet port and slide seal outlet port. Equipped with 'Shockwave' springless diaphragm. The 4 series valves are available as remote pilot valves and may be converted to integral pilot using either the RCA3DM or RCA3PV screw-in pilots. Outlet is at 90° to inlet. The FS valve range features a larger diameter inlet providing higher performance than the DD, T or ST body styles.

#### SUITABLE FOR

Dust collector applications, in particular for reverse pulse jet filter cleaning and its variations, including bag filters, cartridge filters and envelope filters, ceramic filters and sintered metal fibre filters.

#### CONSTRUCTION

Body: Aluminium (diecast) Screws: 304 Stainless steel

Seals: Inlet O-ring: Nitrile used with shockwave diaphragm, Viton with Viton

diaphragm

Outlet: EPDM used with shockwave diaphragm, Viton with Viton diaphragm Diaphragm: Proprietary highperformance engineering thermoplastic Elastomer or Viton

#### **OPERATION**

Recommended on-time range: 50 to 500 ms Recommended time between pulses: 1 minute or greater

#### **MAINTENANCE**

Before conducting any maintenance activity on the system ensure that components are fully isolated from pressure and power supplies. Pressure and power should not be reapplied until the valve has been fully assembled. Diaphragm and pilot unit inspection should be conducted annually.

#### **APPROVALS**

The RCAC20FS4 meets the requirements of the European Low Voltage Directive 2006/95/EC, when fitted with the RCA3PV pilot.

Please Note: We recommend using Schedule 40 pipe. Thickness OD is as shown below.

Note: We are engineering partner as a total system solution provider, GOYEN manufactures a range of components to ensure cost effective and reliable cleaning system design, installation and operation within a reverse pulse filter. Within a reverse pulse filter the overall cleaning efficiency and long term performance of the bags or cartridges are critically dependent upon to control of the cleaning air into the individual filter bag or cartride. GOYEN products are produced to exacting tolerances and quality standards to ensure their effectiveness within any reverse pulse filter. As a comprehensive solution provider, We have great quality control procedures. The calculate various system designs and can work together perfectly. Finally we are fully committed to maintaining environment quality together.
