Passage 2

The widow looked at her dear departed one right before the funeral and, to her horror, found that he was in his brown suit. She had specifically said to the undertaker that she wanted him buried in his blue suit; she had bought it especially for that occasion, and she was distressed that the mortician had left him in the same brown suit he had been wearing when the lightning bolt hit him.

She demanded that the corpse be changed into the blue suit she had brought especially for that purpose. The undertaker said, "But madam! It’s only a minute or two until the funeral is scheduled to begin! We can’t possibly take him out and get him changed in that amount of time."
The lady said, "Who's paying for this?" Seeing the logic to this argument, a very reluctant mortician wheeled the coffin out, but then wheeled it right back in a moment later. Miraculously, the corpse was in a blue suit.

After the ceremony, a well-satisfied widow complimented the undertaker on the smooth and speedy service. She especially wanted to know how he had been able to get her husband into a blue suit so fast. The funeral director said, "Oh, it was easy. It happens that there was another body in the back room and he was already dressed in a blue suit. All we had to do was switch heads!"

33. Which word best describes the widow?
   1. Modest
   2. Considerate
   3. Cooperative
   4. Sensible
   5. Determined

34. Which of the following is NOT true about the lady's husband?
   1. He was beheaded.
   2. He was struck by lightning.
   3. Before his death, he wore a brown suit.
   4. After the ceremony, his body was in a blue suit.
   5. His head was replaced with that of the corpse in a blue suit.
35. How would the lady most likely feel when she found out how her husband
got into a blue suit?

1. Delighted
2. Shocked
3. Threatened
4. Funny
5. Amused

**Part Three News and Book Review (11 items)**

**Passage 1.**

The office of the Convention on International Trade in Endangered Species (unknown as CITES) says rates of elephant poaching and trade in illegal ivory remain very high. In a-news-report, CITES warns that Africa's elephants face an immediate threat to their survival because of continued high levels of poaching for their ivory.

Twenty thousand elephants were illegally killed in Africa last year, the report shows. That figure far exceeds the growth rate of the elephant population. In some regions of Africa elephants are threatened with extinction.

The report also documents a clear increase in the number of large seizures amounts of over 500kg - of ivory in Africa. For the first time there were more such seizures in Africa than in Asia, an indication, the report suggests, of the involvement of transnational organized crime in the illegal ivory trade.

And while elephant conservationists do believe that increased ivory confiscation is a sign that law enforcement is improving, they also point out that demand for
ivory remains very high, and that even in some of the monitored elephant populations, poaching is actually increasing.

36. What would be the best headline for this news article?
   1. How to Protect African Elephants
   2. Save the Last African Elephants
   3. Effective Measures to Protect African Elephants
   4. Poaching threatens survival of African Elephants
   5. Growth Rates of African Elephants in Monitored Areas

37. What evidence indicates the threat of elephant extinction in Africa?
   1. The birth rates of African elephants
   2. The increasing amount of ivory products
   3. The poaching rates of African elephants
   4. The amount of ivory seized around the world
   5. The number of nations importing illegal ivory

38. According to paragraph 3, what did the large number of ivory seizures in Africa indicate?
   1. The business of illegal ivory trade involved many nations.
   2. Illegal ivory trade is damaging Africa’s international reputation.
   3. Many countries are trying to stop the illegal trade of elephant ivory.
   4. Many African countries currently export their ivory illegally.
   5. The conservationists must take more action to protect African elephants.
39. What can be inferred from the last paragraph of the news?

1. The government should increase the severity of punishment for the poachers.
2. The government should find new measures to ban the export of illegal ivory.
3. The elephant conservationists should organize more activities to protect African elephants.
4. No matter how good law enforcement is, elephant poaching is hard to stop.
5. The high demand for ivory of the newly rich people is the main cause of elephant extinction.

Passage 1

SOME people hope that the internet will revolutionize higher education, making it cheaper and more accessible to the masses. Others fear the prospect. Some academics worry that they will be sacked and replaced by videos of their more photogenic colleagues. Others argue that MOOCs (massive open online courses) are nowhere near as good as a class taught face-to-face.

Earlier this year academics at Amherst, a liberal-arts college, decided not to offer MOOCs. Professors in the philosophy department at San Jose State University wrote a letter of complaint because they were encouraged to use a popular online Harvard course, “JusticeX”, as part of their own curriculum.
Even at Harvard, which has invested $30m in MOOCs, much of the faculty is prickly. In May, 58 professor wrote to the dean of arts and sciences to demand greater oversight of MOOCs.

Online education reached 6.7mm students in 2011. A third of those enrolled at traditional colleges took an online course as part of their degrees. MGOC are only a little different: they cater to learners outside an old-fashioned university, generally offer only certificates of completion, and can be used by, and assess, large numbers of students simultaneously.

Academics are over-reacting, argues jack Wilson, the president emeritus of the University of Massachusetts. MOOCs are an interactive textbook, he says. Not every professor writes a textbook, but all can use them. Pre-recorded lectures and multiple-choice questions can lighter the load on lecturers. Sanjay Sarma, the director of digital learning at MIT, describes them as a "force multiplier". Professors will eventually get used to them. But first, says Mr. Wilson, they must "get over the fear factor".

47. What is the main point of paragraph 1?

1. All professors are against MOOCs.
2. Higher education is not accessible to all the ordinary people.
3. Some people are for online education while others are against it.
4. Higher education will be affected by MOOCs.
5. Only photogenic professors are selected to teach online courses.
48. Why did many Harvard professors write to the dean of arts and science?

1. To reject the use of MOOCs.
2. To encourage the development of online courses.
3. To reorganize the process of MOOCs.
4. To stop investing on MOOCs.
5. To call for the more careful review of MOOCs.

49. Which of the following is a statement of FACT?

1. Even at Harvard, which has invested $30m in MOOCs, much of the faculty is prickly. (lines 11-12)
2. Online education reached 6.7 million students in 2011. (line 14)
3. Not every professor writes a textbook, but all can use them. (line 21)
4. Pre-recorded lectures and multiple-choice questions can lighten the load on lecturers. (lines 21-23)
5. Professors will eventually get used to them. (line 24)

50. Where does this passage most likely come from?

1. A research
2. A documentary
3. A debate
4. A magazine
5. A commentary
51. What is one of the advantages of MOOCs mentioned in the passage?
   1. Their quality is unquestionable.
   2. They enable good-looking professors to become famous.
   3. They are more efficient than courses taught face-to-face.
   4. They can be used by a large number of students.
   5. They can add to the load of lecturers.

52. What is the main idea of this passage?
   1. Professors don’t like to teach courses they do not create.
   2. MOOCs make higher education cheaper and more accessible to masses.
   3. Most university administrators have a positive attitude toward MOOCs.
   4. Many professors are hostile to online education.
   5. In spite of some disapproval, online courses are in great demand.

53. How can Jack Wilson be described?
   1. Optimistic
   2. Pessimistic
   3. Stubborn
   4. Emotional
   5. Self-centered
Passage 2

It’s that time of the year when couples show their love for each other by sending cards, flowers and chocolates. But Valentine’s Day is not only about public displays of affection: in recent years it has also become big business. In the UK alone, more than 20 million pounds is spent on flowers, whilst in the United States over 1 billion dollars is forked out on chocolates.

Although Valentine’s Day has become a global industry with more than 80 million roses sold worldwide, the origins of the day are unclear and hidden in the mists of time. Nobody knows exactly who St Valentine was, although some historians suggest he was a Roman martyred in the third century AD by a Roman Emperor. It is said that the first recorded Valentine’s card was sent by the imprisoned Duke of Orleans in 1415. It is believed that he sought solace from his confinement by writing love poems to his wife.

Valentine’s Day, or its equivalent, is now celebrated in many countries around the world. However, the traditions often differ from place to place. In Japan, for example, it is customary for the woman to send chocolates to the man, whilst in Korea April 14th is known as ‘Black Day’ and is when the unfortunate men, who received nothing on Valentine’s Day gather to eat noodles and commiserate with each other.

Technological developments have also played their part in keeping Valentine’s Day relevant in the 21st century. Valentine’s e-cards have been all the rage in recent years. However, internet security experts urge web users to be wary as malicious hackers could use e-cards to spread viruses and spyware.
Valentine’s cards can also be used for less than romantic purposes. Police in the UK city of Liverpool sent Valentine’s cards to criminals who failed to appear in court or have not paid fines. The cards contained the verse, ‘Roses are red, violets are blue, you’ve got a warrant and we’d love to see you. Who says romance is dead? 

54. Which statement is TRUE according to the passage?

1. The very first Valentine’s card was sent over 500 years ago.
2. Sending flowers is the only way to show affection on Valentine’s Day.
3. The most important aspect of Valentine’s Day is that it is a big business holiday
4. Many people around the world celebrate Valentine’s Day in the same way.
5. It is believed that a Roman Emperor is the first person who sent Valentine’s card.

55. What does the passage say about the origins of Valentine’s Day?

1. Are widely known
2. Remained a mystery
3. Have been scientifically proven
4. Are based in Christianity
5. Are historically recorded

56. Who do some historians believe was St Valentine?

1. A Duke of Orleans
2. A Roman Emperor
3. The first card sender
4. A Roman historian
5. A Roman martyr
57. Why do some Korean men eat noodles together on Black Day?
   1. To express their friendship
   2. To show sympathy for one another
   3. To display affection to their partners
   4. To celebrate their freedom
   5. To get together with other singles

58. What can replace the phrase all the rage’ (line 21)?
   1. Lucky
   2. Annoying
   3. Challenging
   4. Convenient
   5. Popular

59. What is discussed in paragraph 4?
   1. The development of e-cards.
   2. The reaction against e-cards
   3. The advantages of sending e-cards.
   4. The danger of sending e-cards
   5. The way to protect against viruses and spyware

60. How does the writer end the passage?
   1. Tragically
   2. Surprisingly
   3. Humorously
   4. Seriously
   5. Gracefully
