ProductView

Superior Laser Lighting

4,000 lumens high brightness provides the ability to project crystal clear, vibrant images from a long distance on a large screen even in daytime indoors.

Acer BlueLightShield

Acer BlueLightShield allows users to lower levels of blue light to lessen the negative effects of blue light exposure. There are three levels of filter in projector suitable for different scenario. Each level also contains dynamic mechanism that will optimize the blue light level based on content. BlueLightShield can reduce up to 30% blue light and protect your eyes.

Wireless Projection

Paring with default Acer wireless dongle¹, you will be able to skip the cable and project from your smartphone, laptop or PC via wireless signal. Screen Mirroring² support allows quick and seamless screen-mirroring without installing extra app.

- 1 Wireless dongle is required for wireless projection. Wireless dongle is standard accessory.
- 2 Additional device must support Miracast technology.

Acer LumiSense

LumiSense incorporates a clever content-aware process. It analyzes projected content frame by frame and dynamically adjusts image visibility to optimum levels. Thanks to LumiSense intelligent judgment and dynamic adjustment, all dark scenes are clearly displayed with no loss of detail.
