System Function

1. Reads and Encodes parking information on card with contact-less.
2. Erases printed parking information on card by Ticket Eraser.
3. Stores about 150-200 IC or ID cards
4. Installed at the entrance with electric barrier, and issues hourly tickets to incoming drivers.
5. Encodes date/time, serial number, unit number and parking number on card.
6. When the unit reads season card, year card, park value card, and temporary card, and then the electric barrier opens.
7. When the parking lot is full, ticket-issuing is stopped and the full sign appears.
8. An intercom and a call button are provided for the user to contact the managing office.
