- 9** **Affordable, Easy Maintenance**
Safe, non-toxic solution for around the same price as a traditional chlorine system
- 10** **Prolongs equipment & salt cell life**
Ozone Swim does up to 80% of pool water purification

"Ozone Swim system is really unique."

- Mark Glynn, QLD

"Amazing water clarity and feel since we installed Ozone and Mineral Swim to our existing system. Didn't think we would notice much difference if any. The difference is obvious, the water sparkles and my skin is healthier than even when I'm not swimming!"

- Michelle Sumner, QLD

EXCEPTIONAL POOL PURIFICATION

"I am so happy that I went ahead with the installation of the Ozone Mineral System and highly recommend it to anyone as a new pool or upgrading an existing pool. I particularly recommend All Clear Pool Supplies at Windsor."

- Julie, Sackville NSW

"The Mineral Swim system with Ozone is just fabulous the water is crystal clear and feels like silk on my skin. If the water level goes down it will be because someone is drinking it, it is that pure!!! I believe it is probably the best thing I have done to this pool and I thank you for the recommendation and your care of my pool. "

- Beryl, Londonderry NSW

"The combination of magnesium with an ozone system, has enabled me to run chlorine levels at a much lower level and the water just sparkles & shimmers. So happy I upgraded my pool to this system."

- Mike Latchford, Melbourne
