### Specifications:

backrest:high-quality polyurethane cold-foamed, the density of foam sponge (45-65kg/m<sup>2</sup>) is comfortable for human body, to ensure the fabric cloth could stick to the foam. The internal high-quality cold steel and veneer are made to fix up spring, which make sure every chair is comfortable ,durable ,non-deformed, and elegant appearance .

Lifting mechanism: Tip- up seat with combination of spring and damping provides the lifetime of quite return.. which is less than 25db.

The out cover of the backrest is made of red beech wood which is smooth and comfortable, and the sound adsorption holes are designed on the shell of the seat pan.

Fabric: hemp soft cloth, Flame retardant, abrasion resistant, resistance to soiling, antistatic, resistant to fading, resistant to transformation and comfortable.
