The industry standard is now available with Rapid Fix™ brackets for fast installation. The RF-33 provides a safe secure grip and excellent wall protection.

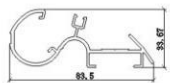

**RF-33**

## NTIMICROBIAL DASH-PROOF HAND-GUARDS SERIES

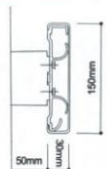

With a total height of 89mm, the RF-07 is designed to reduce the handrail's visual impact on a wall. For added impact, specify an optional vertical accent. The HRB-35 features Rapid Fix™ brackets and end caps for ease of installation.

**RF-07**

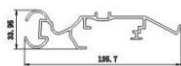

The new classic RF-60 is a handrail/bumper guard that combines maximum protection with maximum aesthetics. The rail's Rapid Fix™ feature simplifies installation. Optional vertical and horizontal accents and colours are available.

**RF-60**

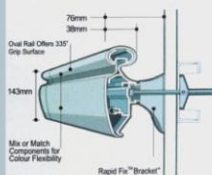

The new classic RF-16 is a handrail/bumper guard that combines maximum protection with maximum aesthetics. The rail's Rapid Fix™ feature simplifies installation. Optional vertical and horizontal accents and colours are available.

**RF-16**

The new classic RF-16 is a handrail/bumper guard that combines maximum protection with maximum aesthetics. The rail's Rapid Fix™ feature simplifies installation. Optional vertical and horizontal accents and colours are available.

**RF-16-1**

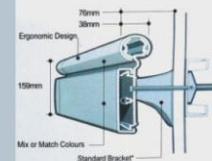

The RF-35 offers exceptional wall protection combined with the warmth of a round wooden handrail. The shock absorbing crash rail portion features an internal bumper cushion for added protection. The accent reveal can coordinate or contrast.

**RF-35**

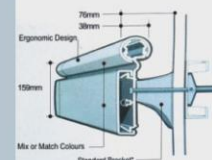

The RF-08 offers numerous design options. Designers can integrate up to three different colours in each HRB-10C handrail, by incorporating different colour to top rail, facing rail and accent.

**RF-08**

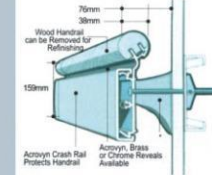

The RF-34 offers numerous design options. Designers can integrate up to three different colours in each HRB-10C handrail, by incorporating different colour to top rail, facing rail and accent.

**RF-34**

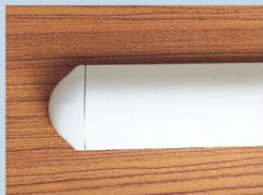

The RF-19 offers numerous design options. Designers can integrate up to three different colours in each HRB-10C handrail, by incorporating different colour to top rail, facing rail and accent.

**RF-19**

## PVC ANTI-COLLISION CLAPBOARD SERIES

For higher abuse environments, the RF-53 provides 76mm of surface protection. The RF-53 clip and retainer system allows it to follow the contour of the wall.

**RF-53**

For higher abuse environments, the RF-38 provides 126mm of surface protection. The RF-38 clip and retainer system allows it to follow the contour of the wall.

**RF-38**

For higher abuse environments, the RF-54 provides 150mm of surface protection. The RF-54 clip and retainer system allows it to follow the contour of the wall.

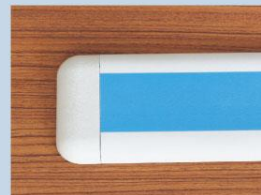

**RF-54**

For higher abuse environments, the RF-36 provides 152mm of surface protection. The RF-36 clip and retainer system allows it to follow the contour of the wall.

**RF-36**

For higher abuse environments, the RF-29 provides 100mm of surface protection. The RF-29 clip and retainer system allows it to follow the contour of the wall.

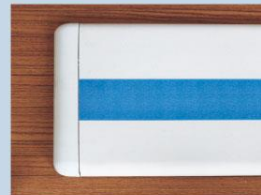

**RF-29**

For higher abuse environments, the RF-23 provides 152mm of surface protection. The RF-23 clip and retainer system allows it to follow the contour of the wall.

**RF-23**

For higher abuse environments, the RF-39 provides 200mm of surface protection. The RF-39 clip and retainer system allows it to follow the contour of the wall.

**RF-39**

For higher abuse environments, the RF-24 provides 303mm of surface protection. The RF-24 clip and retainer system allows it to follow the contour of the wall.

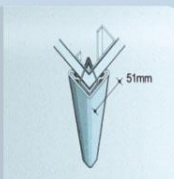

**RF-24**

## PVC COLLISION ANGLE BEAD SERIES

For higher abuse environments, the RF-04 provides 51mm of surface protection. The RF-04 clip and retainer system allows it to follow the contour of the wall.

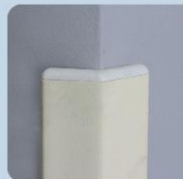

**RF-04**

For higher abuse environments, the RF-20 provides 76mm of surface protection. The RF-20 clip and retainer system allows it to follow the contour of the wall.

**RF-20**

For higher abuse environments, the RF-21 provides 51mm of surface protection. The RF-21 clip and retainer system allows it to follow the contour of the wall.

**RF-21**

For higher abuse environments, the RF-40 provides 51mm of surface protection. The RF-40 clip and retainer system allows it to follow the contour of the wall.

**RF-40**

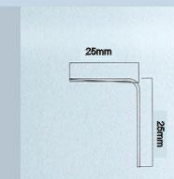

For higher abuse environments, the RF-41 provides 51mm of surface protection. The RF-41 clip and retainer system allows it to follow the contour of the wall.

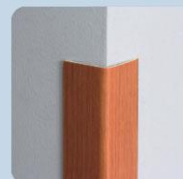

**RF-41**

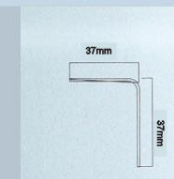

For higher abuse environments, the RF-42 provides 25mm of surface protection. The RF-42 clip and retainer system allows it to follow the contour of the wall.

**RF-42**

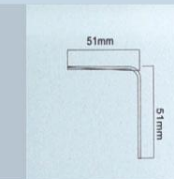

For higher abuse environments, the RF-43 provides 37mm of surface protection. The RF-43 clip and retainer system allows it to follow the contour of the wall.

**RF-43**

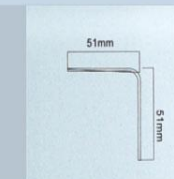

For higher abuse environments, the RF-44 provides 51mm of surface protection. The RF-44 clip and retainer system allows it to follow the contour of the wall.

**RF-44**

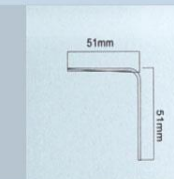

For higher abuse environments, the RF-45 provides 51mm of surface protection. The RF-45 clip and retainer system allows it to follow the contour of the wall.

**RF-45**

For higher abuse environments, the RF-46 provides 51mm of surface protection. The RF-46 clip and retainer system allows it to follow the contour of the wall.
