

UPster®

More quality, higher performance, more machine for less money

MEIKO: the art of making good things even better. For this reason we have redesigned all machines in the successful MEIKO UPster® series. The results are in a class of their own. Perfect for getting started or switching to the professional warewashing technology from MEIKO. With the completely fair price/performance ratio only offered by UPster®. Whether undercounter or hood type dishwashing machines – the new UPster® series scores with robust materials, improved technology and more intuitive operation. For longer machine service life, more comfort and greater savings in water, energy and working hours.

The new MEIKO UPster® range of machines makes light work of washing up, and it makes it easier for you to take the plunge into professional warewashing technology!

UPster® U series – under the counter but exceeding the standard

MEIKO's new *UPster® U* range of undercounter dishwashers pulls out all the stops when it comes to professional warewashing technology, offering efficient cleaning performance, easy operation, maximum flexibility, and exceptional value for money. The perfect choice for your wash-up area. Simply plug it in and you're ready to go!

UPster® U 400

Get glassware and dishes sparkling clean in no time!

Easy and convenient to operate with an intuitive control panel and digital display. Double-walled thermal insulation to keep the heat in and minimise energy use. That's a pretty cool package!

Rack capacity

up to 30 racks/h

UPster® U 400

All the plus points at a glance

The UPster® U 400 in figures

- **Suitable for tall glasses:**
Entry height 300 mm
- **Small but fine:** rack size 400 x 400 mm
- **Miserly consumption:** 2.2 l per wash cycle

Safety and hygiene

- **Reliable hygiene with no compromises** thanks to digital temperature display for wash and final rinse temperatures
- **Excellent washing results** thanks to excellent wash water filtering and optimum tank water regeneration with the wash water filter system *AktivPlus*
- **Cleanliness down to the smallest nooks & crannies** due to top and bottom washing and final rinse system

Comfort and serviceability

- **Uncomplicated operation thanks to the fully electronic control** with 3 program cycle times
- **Operating errors excluded** thanks to the highly intuitive operating concept
- **Always a clean wash chamber** due to convenient self-cleaning program
- **Protects glasses and dishes** with a wash pump with soft start

Quality and longevity

- **Remains quiet and cool outside** by double-walled construction with insulation of the door
- **Robust and hygienic** thanks to extended wash chamber with integrated rack guides
- **Protection of the machine components** by stainless steel back wall panelling

Simple installation and service

- **Simple ordering, fast delivery**
- **Immediately installed:** complete connection kit for water, waste water and electricity included
- **Plugs in anywhere:** 400 V or 230 V – can be changed on site
- **Easy maintenance:** electronic interface and easy service access

The stripped down pro wash chamber: robust technology and premium materials ensure long machine service life and easy cleaning.

UPster® U 500 G / U 500

The economic miracle under the counter

The new *UPster® U 500 G* glasswasher effortlessly cleans cups, plates and cutlery. It is a robust "all-rounder" for the counter area. Everything that has to be clean and spotless at the counter fits in here.

Thanks to the top wash system no corner remains dry. The simple operation and the many comfort features ensure a hygienic and convincing wash result. With its lower overall height, the *UPster® U 500 G* fits under nearly every counter. Whether mounted on a plinth or with integrated *GiO MODULE* under the machine.

The new *UPster® U 500* is a solid all-rounder: tableware and glasses as well as larger items of washware are handled with ease. With its appealing, modern design and the use of proven MEIKO technology, the *UPster® U 500* always cuts a fine figure even behind the counter. And the features speak for themselves: spacious wash compartment, comfortable self-cleaning program, soft start for very gentle washing, 3 program cycle times, convincing consumption values and *GiO MODULE* (optional). And all for an absolutely fair price. The makes the *UPster® U 500* into the cleaning star in the new price/performance class from MEIKO.

UPster® U 500 G / U 500

All the plus points at a glance

The UPster® U 500 / U 500 G in figures

- **Outstanding for large plates, cups and cutlery:**
Entry height 420 mm (U 500), 315 mm (U 500 G)
- **A lot of space for brilliant wash results:**
rack size 500 x 500 mm
- **Efficient water consumption:** 2.6 l per wash cycle

Hygiene assurance and cleanliness

- **Hygiene assurance without compromises** thanks to digital temperature display for wash and final rinse temperatures, and permanent temperature control
- **Excellent rinsing results** due to excellent wash water filtration and optimum tank water regeneration with the *AktivPlus* wash water filter system
- **Cleanliness that penetrates the last nook and cranny** with the top and bottom wash and final rinse system
- **No detergent residues:** Due to the inbuilt gradient in the wash and final rinse systems as well as the washing compartment ceiling, no drops fall on the cleaned washware
- **Consistent, reliable cleaning results:** Thanks to the pressure booster pump cleans the UPster® U 500 / U 500 G independently of the mains water pressure

Comfort and serviceability

- **Uncomplicated operation thanks to the fully electronic control** with 3 program cycle times
- Highly intuitive blue operating concept **eliminates risk of operator errors**
- **Always a clean wash chamber** through the intuitive self-cleaning program and tank cover sieve for selective removal of dirt in the *AktivPlus* fine filter
- **Protects glasses and dishes** with a wash pump with soft start

Quality and long service life

- **Robust for heavy commercial use:** wash and final rinse arms as well as dosing pipes made of stainless steel
- **Remains cool and quiet outside** by double-walled construction with insulation of the door
- **Robust and hygienic** thanks to extended wash chamber with integrated rack guides
- **Protection of the machine components** by stainless steel rear panelling

Simple installation and service

- **Simple ordering, rapid delivery**
- **Plug&play:** complete connection kit for water, waste water and electricity included in scope of delivery
- **Fits everywhere:** drain pump makes installation independent of building discharge height
- **Simple service:** electronic interface and easy service access

Wash chamber always clean thanks to comfortable automatic self-wash program

The UPster® U 500 with optional integrated MEIKO *AktivClean* water softening is a highlight of MEIKO engineering. **No waiting times or operational interruptions:** washing can continue during regeneration. No tank discharge is required. It only has to be topped up with salt.

Complete operating assurance: the LED salt level indicator ensures complete control.

UPster® U 500 G / U 500

Everything for greater cleanliness and hygiene

The AktivPlus wash water filter system:

This means multiple filtered tank water and backup coarse screening for the pump – with easy handling of the system designed in. And that pays real dividends, producing sparkling cleanliness with minimal water consumption – just 2.6 litres of fresh water per wash cycle!

Consistently excellent wash results:

Economical 11 litre capacity of wash tank. Just the right amount, which is rapidly and with noticeable effect regenerated by the continuous fresh water final rinse.

A clean piece of work:

The deep-drawn, generously dimensioned washroom is easy to clean and clear. This is in part also due to the integrated rack guides and consistently rounded off corners.

The prerequisites for a long service life:

Robust engineering and premium materials make the UPster® so reliable. Stainless steel, also for the dosing pipes, is therefore a must.

Quick, economical and reliable installation:

Thanks to the connection kit for water, waste water and electricity, every MEIKO UPster® is rapidly set up and even more quickly connected. The built-in drain pump can also connect to on-site drains outlets up to 700 mm in height.

MEIKO GiO MODULE – everything always brilliantly clean

Clean dishes and dry glasses are an absolute must. With the MEIKO GiO MODULE you will always shine because it ensures perfect washing results and a brilliant finish. Meaning that manual polishing was yesterday.

The MEIKO GiO MODULE is the reverse osmosis system for first class water treatment. With a purity of approx. 98 %, it produces almost completely desalinated water. The economic and environment-friendly way to perfectly shiny, clean and hygienically clean dishes.

The advantages of the MEIKO GiO MODULE at a glance:

- spotless wash and drying result
- valuable time savings:
 - no manual polishing up
 - faster loading and unloading
- fewer glass breakages
- no space wastage due to compact machine dimensions
- complete connection kit included in scope of delivery
- fully integrated into the dishwasher's control system
