

Happily waste-free! You too?

A circular frame with a green border contains a man with a large, full brown beard and a red apple balanced on his head. The man has a grumpy, angry expression, with furrowed brows and a slight frown. The background is a light blue sky. A white horizontal bar is overlaid across the middle of the circle, containing the text.

Snarl for sustainability!

Green solutions are the future!

Food waste is an issue that affects everyone. Fortunately, MEIKO GREEN Waste Solutions takes a no-nonsense approach to tackling it. We optimise both the environmental and economic aspects, covering everything from the disposal units to the collection tank. All in all, you can rely on us for a full range of green technology that will leave your kitchen happily waste-free. And that's a promise!

" ...we want to rock the market... "

Dr.-Ing. Stefan Scheringer / CEO MEIKO Group

Now that's clever!

Disappears like magic!

Get rid of waste at the touch of a button!

Our pump and vacuum systems feature various different disposal units that get rid of food waste at the touch of a button. Clean and odour-free, this is the first step in the recycling process. So you can concentrate on cooking instead of wasting your time focusing on food waste!

How on earth do they do that?

Tailored to perfection

A: Disposal unit and collection tank on the same floor

The homogenised biomass travels up an ascending pipe and through a pipe in the suspended ceiling to reach the collection tank. Our standard PE tanks can hold between 1 and 5 m³ – the perfect solution.

B: System solutions across multiple levels

Whether you're sending waste from a rooftop bar to the 7th floor or from the wash-up area on the ground floor down to the second basement level, we've got you sorted. We can provide cylindrical PE tanks that are perfectly tailored to your needs, and add them to your existing set-up as required.

C: System with underground tank

Space is at a premium in many buildings. Our underground tanks offer a simple and economical way to shift biomass storage underground. Available in whatever size you need.

Has that given you food for thought?

It's time to make way for green solutions – demanding customers all over the world are increasingly opting for innovative technology from MEIKO GREEN Waste Solutions.

There's no time to waste – so why not get started on your project now?
