

THRILL

The ultimate in Sanitation & Freezing

THRILL VORTEX is the solution
for sanitizing and cooling glasses instantly
all with one simple touch!!

Sanitize & chill in an instant with THRILL

If you ever wondered why the cocktails served in the most trendsetting bars tend to taste so much better, the answer may lie not in the contents of the glass, but within the glass itself. A glass that has been properly cleaned and sanitized enhances the overall taste experience. The invisible residue that remains after washing may adulterate the taste and odor of drinks, compromising the quality of the products served.

Thanks to THRILL, it takes just a few seconds to thoroughly sanitize & chill the glass, leaving the product completely free of any unpleasant odors or aftertaste, allowing for a truly unique tasting experience!!

A unique innovation in the food and beverage industry. When it comes to meeting the needs of the hospitality and catering industry, not only does THRILL vastly improve sanitation and hygiene, its stylish design and theatrical impact make it a ‘must have’ for upmarket bars and restaurants.

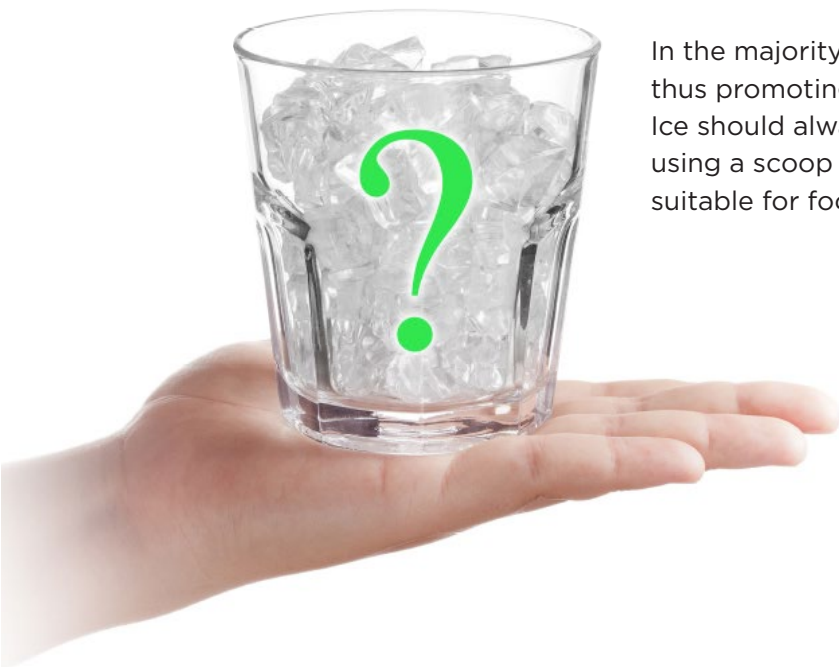

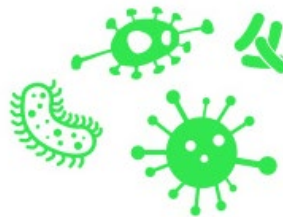

THRILL

A revolution in fast chilling.

With the THRILL VORTEX, innovation comes in from the cold, providing the trade with instantaneous glassware sanitation and chilling. THRILL takes the beverage tasting experience to a completely different level.

In the majority of cases, icemakers are not cleaned regularly, thus promoting the proliferation and spread of dirt and bacteria. Ice should always be transferred from the icemaker to the ice bucket using a scoop that has been properly cleaned and kept in a container suitable for food use.

Once on the counter, the ice-bucket should be protected from possible sources of contamination and when the ice is transferred to the glass it should be done using clean pincers or a ice scoop.

THRILL destroys over 88% of the bacteria present in drinking glasses using liquid carbon dioxide.

Inoculated microorganism	Pre-treatment	Post-treatment
Salmonella enteritidis	9 x 10 ²	< 1 x 10 ² (> 88 %)
Staphylococcus aureus	6 x 10 ²	< 1 x 10 ² (> 83 %)
Escherichia coli	8 x 10 ²	< 1 x 10 ² (> 87 %)
Penicillium nalgiovense	2 x 10 ²	1 x 10 ² (> 83%)
Listeria innocua	5 x 10 ⁴	1 x 10 ³ (80 %)
Pseudomonas putida	3 x 10 ⁵	1 x 10 ⁵ (> 66 %)
Brettanomyces bruxellensis	2 x 10 ²	< 1 x 10 ² (50 %)

For each organism, a control glass (inoculated and untreated) was prepared and tested against a second glass that had been inoculated and treated with carbon dioxide. After drying the glasses to ensure the microorganisms had adhered to the sides of the glass, the treatment, which consisted of blasting carbon dioxide into the inside of the glasses, was performed. Data in colony-forming units (CFUs) / glass (% reduction).

Certificate of analysis N. 154 / MC (07.15.2014) issued by the Department of Food Science, University of Udine.

The THRILL VORTEX can be used to chill and sanitize drinking glasses as well as small, medium, large and extra large liquid containers in either glass or food grade plastic.

Size	Sanitation & Cooling	Sanitation & Freezing
Small	2 Sec. / 1 Shot (10 gr)	4 Sec. / 2 Shot (20 gr)
Medium	3 Sec. / 1 Shot(15 gr)	6 Sec. / 2 Shot (30 gr)
Large	3 Sec. / 1 Shot(15 gr)	9 Sec. / 3 Shot (45 gr)
Extra Large	5 Sec. / 1 Shot (25 gr)	15 Sec. / 3 Shot (75 gr)

sanitize & chill glassware in seconds

Thrill is a brilliant machine that sanitizes glassware in seconds and keeps drinks cooler longer, neither watering down nor altering the flavor and aroma of beverages. A glass that has been properly cleaned and sanitized enhances the overall taste experience. The invisible residue that remains after washing may adulterate the taste and odor of drinks, compromising the quality of the products served. With Thrill, it takes just a few seconds to thoroughly sanitize and chill the glass, leaving the product completely free of any unpleasant odors or aftertaste, allowing for a truly unique tasting experience.

CO₂ Requirements: The Thrill Tabletop and Built-In operate using food grade CO₂ for sanitization and chilling (sold separately). In order to ensure an efficient and effective level of sanitation and cooling the cylinders used must be fitted with a syphon tube. 20Lb CO₂ tank recommended. Please consult local CO₂ provider for proper requirements.

H=Height M=Max Diameter T=Top Diameter B=Bottom Diameter • All Products are Measured at Max Capacity (oz) For further details contact your customer service rep.

does your business have limited space?

Thrill's new extended reach tubing (ERT) allows you to place the CO2 cylinder away from the bar area. Options for ERT are 30ft and 40 ft
