

SOTI MOBICONTROL CLOUD

SOTI MobiControl includes deployment options that cater to organizations of all sizes, industries and security requirements. From pilot project to full deployment, SOTI MobiControl Cloud is a secure, hosted version of our award-winning mobility management solution. It lets you leverage SOTI's extensive market experience to get a proven mobility management solution up and running in minutes, not days, weeks or months. SOTI MobiControl Cloud reduces your infrastructure requirements, the need for trained IT staff, and automatically upgrade your SOTI MobiControl software at your request.

SECURITY & PRIVACY

SOTI hosts our client infrastructure within the undisputed global leader in hosted services, Amazon Web Services. AWS maintains an extensive list of certifications, including FISMA, PCI DSS, ISO 27001, SOC 1/SSAE 16/ISAE 3402, SOC 2, and HIPAA.

SOTI MobiControl Cloud deployments are completely segregated and private. Single tenancy keeps your company's data separate from other enterprises. All stored data is fully encrypted, and SOTI uses TLS 1.2 connections to provide secure data communications between your web console and the SOTI MobiControl host. Our development and cloud infrastructure have been ISO 27001 certified.

What SOTI MobiControl Cloud can do for your business

Accessing your mobility management solution through cloud services can provide tremendous benefits for your company, but it is not without its own set of challenges. SOTI's MobiControl Cloud can help your business take full advantages of all the cloud has to offer while mitigating many of the associated risks, such as privacy, security and compliance.

Instant and Always Available

A fully operational MobiControl instance that meets your unique mobility management needs can be set up and configured in minutes. Instant availability means your mobile devices are enrolled and managed immediately. We are committed to achieve uptime of 99.9% availability as stipulated within our SOTI MobiControl Cloud SLA.

Automatic Disaster Recovery

Disaster recovery and business continuity planning are required for any company providing cloud services. Our disaster recovery (DR) are consistently updated and tested to provide our clients with peace of mind. Additionally, we are able to custom DR plans for you that meet your unique business objectives.

Easy Backup and Restore

Our backup standard practice allows us to restore your complete environment within minutes. We offer you the choice to dictate the geographic location of your servers. All backups are segregated and encrypted to satisfy your security needs.

Scalability

Adding new devices to your hosted mobility management solution is quick and easy. You can add thousands of devices to your system configuration in minutes. In addition, our automated process detects the state of the servers and recommends an action to upgrade them.
