SOTI SNAP
BUILD MOBILE APPS FASTER AND EASIER

Many businesses rely on mobile technology to drive the success of their company, and mobile apps are playing a leading role. Companies benefit from mobile office productivity apps and mobile versions of enterprise solutions, but the real game-changer is closer to home. Businesses are starved for custom apps to help them reinvent their line of business (LOB) workflows. These LOB apps may be developed internally, or outsourced to third-party app developers. In either case, it can be expensive, time-consuming, or in some cases not possible. SOTI Snap lets anyone build mobile apps for your business quickly and easily.

UNLEASH YOUR INNER DEVELOPER

SOTI Snap is a cross-platform, mobile application development solution for business. It lets organizations build the mobile apps they need faster, cheaper and on time. You don't need coders — with SOTI Snap anyone can build an app by dragging and dropping the widgets they need. This enables businesses to prototype, iterate and deploy apps in minutes or hours, not days or weeks. SOTI Snap takes the cost, complexity and coding out of mobile app development for your business.

What SOTI Snap can do for your business

Build the apps you need faster

SOTI Snap is an innovative rapid application development solution that lets anyone build a mobile app.

- Simultaneously create apps for both Apple® iOS, and Google Android™ devices
- Building apps is as easy as dragging and dropping widgets onto a device-shape canvas and then customizing their look and feel
- Use "Design Patterns" to define and reuse common groups of widgets accross multiple apps

## Automate your critical line of business workflows

SOTI Snap makes it easy to automate and support small, but critical workflows for any line-of-business. Don't rely on post-it notes or emails anymore.

- Create electronic forms to capture data in minutes, and quickly modify the app when regulations or you business changes
- Streamline data entry by scanning barcodes, taking photos, reading NFC tags, or capturing geolocation coordinates
- Use rich media such as sound, images and videos to add depth to your application

Integrate with other key business solutions

SOTI Snap integrates with many different products and solutions

- Import/Export app data to and from central files and cloud solutions via REST APIs, webhooks and Zapier integration
- Server-side scripting enables multi-app, multi-step workflows
- Out-of-the box integration with the SOTI ONE platform delivers mobile application management, and remote support capabilities
