SINOPEC JUSTAR J700 A3/B4/SP 5W-40 Engine Oil

### **SECTION 1. Identification**

GHS product identifier: SINOPEC JUSTAR J700 A3/B4/SP 5W-40 Engine Oil

Other means of identification: See Section 3

Product Code 63003757

Recommended use of the chemical and restrictions on use:

Recommended use: SINOPEC JUSTAR J700 A3/B4/SP 5W-40 engine oil can be used for gasoline engines,

the light-duty diesel engines (without GPF/DPF) and gas engines.

Recommended Restrictions: Not available.

Supplier's details:

Supplier (Manufacturer): SINOPEC LUBRICANT CO.,LTD.

Address: No. 6 Anning Zhuang West Road, Haidian District, Beijing, P.R.China

Post Code 100085

Contact person (E-mail): csc.lube@sinopec.com

Long chain alkyl phenol	125643-61-0	406-040-9	0.2~0.5

## **SECTION 4. First aid measures**

#### Description of necessary first-aid measures:

In all cases of doubt, or when symptoms persist, seek medical attention.

In case of inhalation: No specific first aid measures are required. If exposed to excessive levels of material

in the air, move the exposed person to fresh air. Get medical attention if coughing or

respiratory discomfort occurs.

In case of skin contact: No specific first aid measures are required. As a precaution, remove clothing and

shoes if contaminated. To remove the material from skin, use soap and water. Discard

contaminated clothing and shoes or thoroughly clean before reuse.

In case of eyes contact: Rinse the eyes with plenty of water.

medical

In case of ingestion: Clean mouth with water and drink plenty of water.

Most important symptoms/effects,

of

acute and delayed:

The product is not classified as harmful to human health effect. If skin irritation or rash occurs, get medical advice/attention.

attention and special treatment needed.

#### SECTION 5. Fire-fighting measures

Suitable extinguishing media: Use water fog, foam, dry chemical or carbon dioxide to extinguish flames.

Unsuitable extinguishing media: Water.

Specific hazards arising from the In case of heat, fire and strong oxidants can lead to burning. Fumes, smoke, carbon

chemical: monoxide, sulfur oxides, aldehydes, nitrogen oxides, phosphate, certain metal.

Special protective actions for fire-Fire-fighters should wear appropriate protective equipment and self-contained

fighters: breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

# SECTION 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures:

For non-emergency personnel: Provide adequate ventilation. Avoid skin and eye contact. Refer to section 8 of SDS for

personal protection details.

For emergency responders: Wear an appropriate NIOSH/MSHA approved respirator if dust is generated.

**Environmental precautions:** Do not allow material to be released to the environment without proper governmental

permits.

Methods and materials for containment

and cleaning up:

Stop the source of the release if you can do it without risk. Contain release to prevent further contamination of soil, surface water or groundwater. Clean up spill as soon as possible, observing precautions in Exposure Controls/Personal Protection. Use appropriate techniques such as applying non-combustible absorbent materials or pumping. Where feasible and appropriate, remove contaminated soil. Place

contaminated materials in disposable containers and dispose of in a manner consistent

with applicable regulations.

Reference to other sections: See Section 7 for information on safe handling.

Product name: SINOPEC JUSTAR J700 A3/B4/SP 5W-40 Engine Oil Issue date: NOV 10, 2020. Revision date: MAR 01, 2023. Version #: 2.0

See Section 8 for information on personal protection equipment.

See Section 13 for information on disposal.

Additional information: Not applicable.

## **SECTION 7. Handling and storage**

Precautions for safe handling:

Provide good ventilation. Prevent electrostatic charge - sources of ignition should be kept well clear - fire extinguishers should be kept handy. Avoid contact with skin and eyes. Avoid prolonged exposure. Wear appropriate personal protective equipment. Observe good industrial hygiene practices. When using, do not eat, drink or smoke.

Wash hands thoroughly after handling.

Conditions for safe storage, including any incompatibilities:

Store in tightly closed original container in a dry, cool and well-ventilated place.

Container is not designed to contain pressure. Do not use pressure to empty container or it may rupture with explosive force. Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned to a

drum reconditioner or disposed of properly.

## **SECTION 8. Exposure controls/personal protection**

Control parameters: Not available.

Appropriate engineering controls: Use in a well-ventilated area.

Individual protection measures, such as personal protective equipment (PPE):

Eye/face protection:

Skin protection:

No special eye protection is normally required. Where splashing is possible, wear safety

glasses with side shields as a good safety practice.

No special protective clothing is normally required. Where splashing is possible, select protective clothing depending on operations conducted, physical requirements and other substances in the workplace. Suggested materials for protective gloves

include: Neoprene, Nitrile Rubber.

No respiratory protection is normally required. No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material. If user operations generate an oil mist, determine if airborne concentrations are below the occupational exposure limit for mineral oil mist. If not, wear an approved respirator that provides adequate protection from the measured concentrations of this material. For air-purifying respirators use a particulate cartridge. Use a positive pressure air-supplying respirator

in circumstances where air-purifying respirators may not provide adequate protection.

**Thermal hazards:** Wear suitable protective clothing to prevent heat.

### **SECTION 10. Stability and reactivity**

Reactivity: The substance is stable under normal storage and handling conditions.

Chemical stability: This material is considered stable under normal ambient and anticipated storage and

handling conditions of temperature and pressure.

**Possibility of hazardous reactions:** No dangerous reaction known under conditions of normal use.

Conditions to avoid: Contact with incompatible materials.

Incompatible materials: May react with strong acids or strong oxidizing agents, such as chlorates, nitrates,

peroxides, etc.

Hazardous decomposition products: None known (None expected).

**Persistence and degradability:** This product is expected to be inherently biodegradable.

Bioaccumulative potential: Bioaccumulation is unlikely due to the very low water solubility of this product; therefore

bioavailability to aquatic organisms is minimal.

Mobility in soil: When released into the environment, adsorption to sediment and soil will Be the

predominant behavior.

Results of PBT&vPvB assessment: No data available.

Other adverse effects: No data available.

# **SECTION 13. Disposal considerations**

Disposal methods: The material should be disposed of by incineration in a chemical incinerator in

compliance with national and regional requirements.

If empty container retains product residues, all label precautions must be observed.

Return for reuse or dispose according to national or local regulations.
