Questions 14–16

อ่านข้อความประกาศ

SCHOOL LIBRARY NOTICE

Reading Challenge: “20 Books in 20 Days”

Borrow at least one book every two days.

Write a short review after finishing each book.

Students who complete the challenge will receive a certificate.

Important: Books must be borrowed from the school library between 1–20 September.

14. Which student is MOST likely to complete the challenge successfully?

1. Glen borrows 10 books on the first day but does not read them.
2. Samit reads books regularly and writes reviews after finishing them.
3. Maya borrows books from a bookstore.
4. Peter reads online articles but does not borrow library books.

15. Why does the notice mention writing a review?

1. To help students sell books
2. To allow students to borrow unlimited books
3. To make the books shorter
4. To show that students have engaged with the books

16. Which statement is TRUE?

1. Students may borrow books from any library.
2. Students only need to borrow one book.
3. The challenge encourages regular reading over a period of time.
4. Students must buy twenty books

Questions 17–20

The Unexpected Garden

When the school announced that an unused piece of land behind the science building would become a garden, most students were excited. However, Niran was not interested. He believed that gardens were simply places where people planted flowers and waited for them to grow.

During the first week, Niran was asked to help measure the area and decide where different plants should be placed. Soon, he discovered that the project required more thinking than he had expected. Some plants needed more sunlight, while others grew better in the shade. The students also had to calculate how much water the garden would need each week.

A month later, several plants began to die. Instead of blaming one another, the students investigated the problem. They discovered that the soil was not suitable for some of the plants. After discussing several possible solutions, they changed the soil and moved the plants to better locations.

By the end of the term, the garden was not only full of vegetables and flowers but had also become an outdoor classroom. Niran, who had once thought gardening was boring, was now explaining to younger students how plants depended on their environment.

17. Why did Niran change his opinion about gardening?

1. He received money for working in the garden.
2. He discovered that gardening involved problem-solving and learning.
3. His friends forced him to enjoy gardening.
4. He wanted to avoid science lessons.

18. What can we INFER from the third paragraph?

1. The students immediately knew how to solve the problem.
2. The students gave up when the plants began to die.
3. The students used evidence to find the cause of the problem.
4. The students blamed the science teacher.

19. Which of the following BEST describes the main lesson of the story?

1. Gardens are always easy to create.
2. Learning can happen when people face and solve real problems.
3. Students should only study inside classrooms.
4. Flowers are more important than vegetables.

20 . Which statement BEST explains why the garden became an “outdoor classroom”?

1. The garden provided real situations for students to observe, investigate, and learn from.
2. Students were allowed to stop attending normal classes.
3. Teachers decided that classrooms were too small.
4. Students only used the garden for playing games.
