LED Linear Waterproof

Toshiba LED linear waterproof have been specifically developed with IP65-rated linear luminaires and produce an excellent efficiency of 127 lm/W. They are widely suitable for underground parking, warehosue which is designed for best replacement of waterproof flourescent fittings.

LED Floodlight

Toshiba LED Floodlight provides lighting that draws attention to a large area and helps to emphasize textures on vertical surfaces and walls.They can be used in outdoor fields providing steady lumen output and weatherproof functionality. Toshiba LED Floodlight is perfect to use in Facade, signboard and parking area.

LED Floodlight Eco

Brand new series LED Floodlight has a wider power option from 20W to 100W. Comes with bracket light weight design. Optimal lighting, IP65 rating, suitable for indoor and outdoor lighting fixtures to give you a bright and safe night. Fit for landscape lighting, garden, building lighting, hotels and residential, and other outdoor place for atmosphere decorate.

LED Streetlight

The Toshiba LED streetlight series offer more 15 years of service life to significantly reduce maintenance frequency and expense, base on a 50,000 hours life and 12 hours of operation per day. This efficiency fixture can yield up to a 60 percent reduction in system energy compared with standard HID system, depending on roadway applications.

Fluorescent Lamps

Standard

“Toshiba’s standard, the world fluorescent’s standard”

Pre- heat start lamps use a “ start switch “ which operates only at the moment the lamp is switched on to pre-heat the cathodes. The use of this starter permits more economical ballast designs. Of all fluorescent lamps this is the most economical type with long life, high lumen output and low initial cost.

Specification

- » Luminous efficacy up to 75 lm/W for fluorescent 36 W and 61 lm/W for fluorescent 18 W.
- » Available in 3 colors : Daylight, Cool White and Warm White
- » First certificate approval of Green label in Thailand.
- » First TIS certificate of 20,000 hrs. approval in Thailand.

Fluorescent Lamps

Extra (3 Band Phosphors)

“The more clear, the more relieve”

With 3 types of phosphor colored blue, green and red, color performance (the way that the color looks) is vastly improved and color is reproduced vividly. Color performance, where the quality of light has become luxuriant, is obtained by these lamps with the ideal conditions to meet your needs for high quality, authenticity and nature.

Specification

- » Relief with 25% brighter but less power consume as usual.
- » Generate light as close natural light with high color accuracy, CRI 85, while only CRI 69-70 by general fluorescent lamp.
- » Suitable for areas that require more clear such as terrace light, building light.

Fluorescent Lamps

Shatter Proof

“Meticulously developed to protect you”

Due to safety of you all from broken fluorescent tube. Toshiba has developed the Shatter Proof lamps by covered the whole lamp with transparency rasin in order to cover the glass not to spread and do harm to you.

Specification

- » Protected more by cover one more layer on the glass tube with qualitatively resin
- » 25% brighter but small energy consume as usual.
- » Generate light as close natural light with high color accuracy, CRI 85, while only CRI 69-70 by general fluorescent lamp.
- » Suitable to high safety wanted areas such as food factory or office.

Super Daylight

“Fresh light, fresh attractive for a signage”

Fresh light with an overflowing cool-rays. You can create a fresh space with Super Daylight under the color temperature at 12,000 kelvin of Super Daylight and Super Extra Daylight.

Specification of Supre Extra Daylight

- » Color temperature at 12,000 KELVIN, CRI 85.
- » Available in both 18W and 36 W.
- » Suitable for billboard and display shop.
- » More white light can bring up the color of displayed products.

Fluorescent Lamps

“Repel & Lure” insects

3-Band Insect Repellant

ลดแมลงรบกวน
ได้มากกว่า
60%
เมื่อเทียบกับ
หลอดยี่ห้ออื่น

Specification

- » Insects are hard to near to this lamp because this lamp have ultraviolet filter to cut wave length lower than 380nm.
- » Reduce insect infestation than 60%.
- » Last up to 18,000 hrs.
- » 25% brighter than typical fluorescent lamps.

Insect Repellent (Deep Yellow)

Specification

- » Coated with a yellow pigment to cut out wavelengths below 450nm that tend to attract insects. This lamp is ideal for use where insects and pests are undesirable, such as orchards.
- » Last up to 12,000 hrs.

Black Light Fluorescent

Specification

- » This black light lamp emit violet light which attract most nocturnal flying insects such as mole cricket, grasshoppers, crickets and giant water bug.
- » Last up to 5,000 hrs.

Fluorescent Lamps

Special Colors

6 colors variation (Red, Deep red, Blue, Green, Yellow and Deep yellow) provides attractive colorful decoration in shops, restaurants, festivals or special events.

Toshiba utilities in this regard. We focus on the development of color fluorescent to expand happiness, under light more than ever.

Light & Color

- Red : is a warm and positive color associated with our most physical needs. Red light is widely used to decorate any celebration.
- Deep Red : is more sophisticated and serious and less energetic than red. It indicates controlled power and is often favored by the wealthy.
- Blue : is the color of trust and peace. It can suggest loyalty and integrity as well as conservatism and frigidity.
- Yellow : is the color of the mind and the intellect. It is optimistic and cheerful. However it can also suggest impatience, criticism and cowardice.
- Green : It is the color of natural, makes you open and free. While green light is well shining through the water. It is widely used in the shallow squid fishing.
- Deep Yellow : is the color of the loner with an intense curiosity and interest in investigating the finer details of its interests.

Fluorescent Circline

Extra

“Coverage all needs colors to fulfill happiness”

The modern round shape of the Toshiba Circline lamps is the basis, for many unique illumination applications. “Circline” is also available as a table lamp or chandelier and it can be used in conjunction with compact fluorescnt lamps as well.

Toshiba's fluorescent lamp has been changed from liquid mercury to “Amalgam” in order to reduce the spread of mercury into the environment. Toshiba also changed from butyl coating to water base coating, which harmful to humans and the environment.

Specification

- » 25% brighter but small energy consume as usual.
- » Generate light as close natural light with high color accuracy,
- » Ideal for an areas that require extra brightness.
- » Last up to 10,000 hrs.

Compact Fluorescent

NEOBALL 3U

“EFD - they are super star”

The Toshiba's NEOBALL EFD provides high efficacy luminosity than other one on the same series. In advantage, it can save up to 80% energy consume than incandescent lamps and not cause electromagnetic interference during use. This is the super star like no one else.

Specification

- » High luminous efficacy.
- » Available in both 11W and 13W with E27 socket.
- » Up to 80% energy saving than incandescent lamps.
- » Last up to 6,000 hrs.
- » Not cause electromagnetic.
- » EMC standard certified.

NEOBALL 3U

Compact Fluorescent

NEOBALL Twist

“Twist - compact and stylish”

Compact Fluorescent Lamp “Twist” was named from its shape which sompact and small. It is suitably to plenty type of luminaires such as downlight, table lamps and many more. In davantage, as the shape of twist so it can emit the light as same as other shape which has longer body.

Specification

- » High luminous efficiency.
- » E14 socket is available for EFS 8 Watts.
- » Up to 80 % less energy than incandescent lamps.
- » Last up to 6,000 hrs.
- » High efficiency (lumens / Watts).
- » Not cause electromagnetic interference during use.
- » EMC standard certified.
