EI-1050 Utility for Windows

[Log in](#) or [register](#) to post comments

Installation program for a Windows application that performs temperature and humidity readings from a [EI-1050 probe](#). Source code available in the [LabJackPython](#) archive which will work for Windows, Linux and Mac OS X. July 22, 2009, 3.3 MB.

If you get an error message that says something like “This application has failed to start because the application configuration is incorrect ...”, try downloading this update for your machine:

[x86 \(32-bit Windows\)](#)
