Acetic acid, glacial	1 kg
Crystal Violet-Acetic acid Solution	500 ml
Sodium Methoxide 28% in Methanol	1 l

Buffer solutions

A buffer solution of DUKSAN is an aqueous solution consisting of a mixture of a weak acid and its conjugate base, or vice versa. Its pH changes very little when a small or moderate amount of strong acid or base is added to it and thus it is used to prevent changes in the pH of a solution. Buffer solutions are used as a means of keeping pH at a nearly constant value in a wide variety of chemical applications.
